TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java

AI: NLP, LLM Applications, RAG, Claude API, OpenAI API, Amazon Bedrock, SageMaker

Frontend: React, Redux, Next.js, Tailwind

Backend: FastAPI, Spring Boot, Django, Node.js, PostgreSQL, MongoDB

Cloud & DevOps: Linux/UNIX-like systems, AWS (EC2, S3, RDS, Lambda, ECR, Amplify), Docker, GitHub Actions

Testing & Data: Pandas, NumPy, Pytest, Jest

PROFESSIONAL EXPERIENCE

Omni Wellness AI

New York, NY

Software Engineer

April 2025 - Present

- Engineered FastAPI backend services and designed hot/warm/cold data storage layers for medical monitoring data using **PostgreSQL, S3, and Glacier**, supporting AI-powered patient monitoring and outreach.
- Built a production AI outreach feature: when a monitoring device reports an out-of-range patient reading, an LLM voice agent auto-calls the patient and summarizes the conversation into a structured clinical note.
- Built **AWS Lambda**-based webhook ingestion pipelines for patient monitoring devices, reducing dropped measurements by 25% and improving reliability of clinical data ingestion.
- Implemented **Redis** caching with login-time data prefetching and overnight cache prewarming, reducing patient dashboard load times from ~5s to under 1s.

Spending Power Corp.

New York, NY

Software Engineer

April 2024 - November 2024

- Built a high-throughput system with **Spring Boot** and **AWS (EC2, RDS, S3)** backed by **PostgreSQL** that supported **real-time monitoring for 32,000+ crypto wallets** via **Moralis** streams and **QuickNode** scanners.
- Reduced post-launch incidents by **30%** through improved observability using **Firebase** and **AWS CloudWatch**; streamlined **CI/CD** with **GitHub Actions** and **Amplify**, reducing deployment time by 50%.
- Led development of blockchain wallet and marketplace services supporting buyers, sellers, and administrators, contributing to architecture decisions, API design, and code reviews across distributed engineering teams.

Keen Care Management Inc.

Flushing, NY

Consultant

November 2019 - April 2024

- Built and delivered internal **React + Django** app and benefit platform adopted across 13 homecare companies, serving 10,000+ employees and underpinning \$500M+ in annual payroll operations.
- Implemented backend data pipelines with **NumPy** and **Pandas**, cutting payroll processing time by **60%** and lowering recurring payroll costs by **50%**.

PricewaterhouseCoopers LLP

New York, NY

Senior Associate - Core Assurance (Audit), Digital Accelerator

October 2016 - November 2019

- Led automation for annual audits, finished **15 days early** and saved **400 staff hours** by building **Python** ETL pipelines, UiPath bots, and Alteryx + **SQL** workflows that cut testing time by 40%.

RESEARCH & PROJECTS

Georgia Institute of Technology | College of Computing

Atlanta, GA

Research Assistant

January 2026 - Present

- Built a Python-based labor market analysis platform using NLP and O*NET classification to analyze 10,000+ job postings and generate quantitative measures for AI adoption and workforce research.
- Collaborated with faculty and Ph.D. researchers to develop data pipelines and analytical workflows, producing datasets and empirical results that support a forthcoming academic publication.

1st Place, 2024 App Academy Hackathon — Built a prototype AI wellness application for a startup.

EDUCATION

Georgia Institute of Technology | M.S. in CS, Specialization in AI, Degree GPA: 4.0

May 2026

Binghamton University | B.S. in Accounting, Concentration in Information Systems

May 2016
